PROFESSIONAL SUMMARY

Software Developer with hands-on experience building responsive web applications, mobile applications, and networked software using React, Type Script, JavaScript, Python, and modern development tools. Strong foundation in data structures, algorithms, object-oriented programming, APIs, and software engineering, with experience using AI-assisted development workflows for rapid implementation, debugging, code exploration, and iteration.

TECHNICAL SKILLS

- **Languages:** TypeScript | JavaScript | Java | Python | C
- **Frontend:** React.js | React Native | Next.js | HTML5 | CSS3 | Tailwind CSS | Vite
- **Backend & Networking:** Node.js | Flask | REST APIs | Socket.IO | UDP
- **Databases & Cloud:** SQL | NoSQL | Supabase | AWS
- **Developer Tools:** Git | GitHub | VS Code | Figma | Android Studio | Chrome DevTools | Antigravity
- **Core:** Data Structures & Algorithms | Object-Oriented Programming | Computer Networks | Responsive Design

PROFESSIONAL EXPERIENCE

Amnesea

May 2023 - July 2023

Frontend Web Development Intern

Remote

- Developed reusable React.js and Tailwind CSS components to improve UI consistency across web pages.
- Integrated RESTful APIs with backend teams and optimized frontend behavior, contributing to reported **35%** lower page-load times.
- Resolved cross-browser issues and optimized responsive layouts, contributing to reported **20%** higher mobile user engagement.

PROJECTS

Remote Trackpad & Gamepad (Mobile App)

Sep 2026

React Native | TypeScript | Python | UDP | Android

(github.com/AgrShubham/Remote-trackpad-app)

- Built an Android-to-Windows wireless peripheral system supporting trackpad, game-pad, keyboard, and media-control functionality.
- Implemented low-latency UDP input streaming with Wi-Fi host discovery and device pairing for real-time controls.
- Developed configurable control layouts with sensitivity, deadzones, haptic feedback and orientation support

Remote Trackpad (Web application)

Nov 2025

Python | Flask | Socket.IO | JavaScript | Pynput

(github.com/AgrShubham/remote_mouse)

- Built a browser-based wireless peripheral system that turns smartphones and tablets into a desktop trackpad, gamepad, and keyboard.
- Implemented real-time input communication using Socket.IO and user-space OS control through Pynput across all platforms.
- Developed touch-driven interactions including gesture recognition, pointer acceleration, inertial scrolling, virtual gamepad controls, and keyboard input.

Meme Generator

July 2025

React | JavaScript | HTML | CSS | Canvas API

(github.com/AgrShubham/MemeGenerator)

- Developed a React and JavaScript meme generator with real-time text rendering and Canvas API image manipulation.
- Implemented client-side image generation and downloads, removing dependency on server-side image processing.
- Built responsive layouts for mobile and desktop, enabling consistent functionality across screen sizes.

Chef Claude

Dec 2024

React | TypeScript | Tailwind CSS | Vite

(github.com/AgrShubham/Chef-Claude)

- Built a responsive React and TypeScript recipe web application with real-time ingredient management and dynamic UI updates.
- Implemented React Hooks and reusable components to manage interactive state and reduce repetitive UI logic.
- Optimized the frontend using Vite and Tailwind CSS, delivering a lightweight and maintainable application architecture.

EDUCATION

Institute of Engineering and Science, IPS Academy

Indore, India

Bachelor of Technology in Computer Science & Engineering

Sep 2021 - May 2025

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, OOP
- Achievement: 2nd Position — Udaan 2024 CSI Project Exhibition

CERTIFICATIONS

- Machine Learning Foundations - AWS Academy
- Cloud Foundations - AWS Academy
- React.js Essential Training - LinkedIn Learning
- Learning Git and GitHub - LinkedIn Learning
